

Bayside Camp 2020 (updated 6.14.20)

# COVID-19 Safety Protocol Plan

## Daily Health Screening Log

### Campers

Campers will be screened daily upon arrival at the bus or park. Temperature will be taken and three questions will be asked & answers will be recorded-

- 1.) Have you developed any COVID-19 symptoms in the last ten days? [symptoms will be stated out loud]
- 2.) Have you had a positive test of COVID-19 infection in the last ten days?
- 3.) Within the last ten days, have been within 6ft. for longer than 15 minutes with someone who has a suspected illness or confirmed COVID-19 infection WITHOUT taking proper precautions, like wearing a mask and frequently washing your hands during this contact period?

### Staff

Staff are asked to practice self-care and common sense before arriving to the bus or out to camp. Upon arrival, staff will have their temperature checked by the Director, Asst. Director or another designated staff member. They will answer the same questions asked to campers [see stated above] and be screened for COVID-19 symptoms. A daily log of temperature and symptom screening for staff will be kept and maintained confidentially.

Staff or children who have tested positive for COVID-19, or are symptomatic, or who have had a known exposure to a confirmed case of COVID-19, or have a family member currently exhibiting signs of an unknown illness (whether COVID-19 is known or unknown at the time) shall be excluded from attending, according to CDC guidance.

## Arrival/Departure To and From The Bus and/or Park

### Park & Bus

Parents will receive communication in advance, reminding them to use common sense and good judgement maintaining 6 feet of physical distance when arriving with their child out to camp. Staff, children and parents shall wear face coverings when campers are arriving and leaving. Daily health screenings will be done [as stated above] prior to accepting a child onto the bus or out to camp.

## **Bus Transportation**

- Campers attending with siblings will be seated together.
- Campers, staff and the bus driver will wear masks.
- Seats and the bus will be disinfected twice, before and after the campers travel.
- The number of children riding the bus will be limited.

## **Social Distancing**

- Individuals shall maintain 6 feet of physical distance, wherever and as often as possible.
- Campers will be placed in smaller 'like-minded' groups with a 1:9 ratio. Campers will be assigned a counselor when they first arrive on Monday morning and will stay in this group, with this one counselor throughout the day during all instructional camp activities, beach/swim time, lunch, hygiene matters, and so forth. Switching of groups and/or activities will not be allowed.
- Families may choose to have siblings and friends and/or members from their community be grouped together in these like-minded groups.
- Groups at no time will be allowed to intermingle. If groups are in close proximity of each other, they are to maintain no less than a 6ft physical distance at all times.
- Individuals from outside the camp are limited in their interactions with staff and campers, including parents during camper drop off/pick up.

## **Masks/Face Coverings**

- Staff will be asked to wear face coverings.
- If they can be worn safely and consistently, children age 6 and older will be asked to wear face coverings when they're doing more non-active activities in the pavilion, or activities where they are most likely to be next to one another.
- Campers will be asked to wear masks when getting in lines for accountability checks (prior to lunch, swimming), but could possibly be exempt if participating in activities where their use may inhibit participation, due to the heat or during swimming (if allowed).
- Campers will be asked to wear masks when riding the bus.
- Staff, children and parents will wear face coverings when campers are arriving and leaving.

## **Food**

- When teaching/overseeing cooking activities, staff should not offer/use shared items such as serving utensils, bowls, family style 'help yourself' ingredients, or containers. Only a staff member should touch or open solely on their own (& close) any required cooking equipment and disinfect immediately when finished.
- Masks should be worn and ensuring physical distancing is required when campers are awaiting sno-cones or any other special camp treat and/or each group will have their counselor independently attain and provide any 'special' food item to their group.
- During lunch, campers together with their counselor will socially distance from other groups.

## **Prevention/Mitigation Strategies To Slow and Limit COVID-19 Exposure & Spread**

Parents, Campers & Staff will be asked to-

- Children should not come to camp if someone in their household has been ill or is experiencing flu like symptoms.
- Everyone should cover their cough
- Practice recommended regular and routine handwashing practices
- Avoid use of items that are not easily cleaned and disinfected
- Practice proper use, removal, and washing of cloth face coverings

Staff will additionally be asked to-

- Teach about and Incorporate safe COVID-19 practices within their unit group.
- Be familiar with COVID-19 symptoms and take necessary action steps as needed
- Ensure adequate supplies of hand soap, alcohol-based hand sanitizer, and household cleaning products suited for the program.
- Keep each group separate from other groups using physical distancing
- Be especially mindful regarding common shared areas, staggering destination location areas to prevent crowding (like separate bathroom times for each grp.)
- If different groups share common areas, high touch surfaces will be cleaned in the shared area in between group use.
- Keep a cleaning log with the date, time and individual who does the cleaning.
- Be alert for heat-related signs and symptoms and consider additional protective measures for hot and Code Red days.
- Ultraviolet light wands will also be used to help sanitize surfaces and equipment.

## **Response and Management for COVID-19**

- Any staff or child exposed to a person diagnosed with a confirmed or probable case of COVID-19 may not work or attend camp until they have completed self-quarantine following the CDC guidelines. Persons who have recovered from COVID-19, must be cleared for release from isolation according to CDC guidelines.
- If a staff member or a child develops symptoms of COVID-19 during camp, safely isolate the person and place a mask or face covering. Contact the youth camp's health supervisor and the parent/guardian and arrange for safe transportation to a healthcare facility or home.
- If a group has a staff member or a child that is found to have a confirmed or probable case of COVID-19 at camp, the group shall quarantine following the CDC guidelines.
- Individuals may not continue working and/or campers may not return to camp until completing self-quarantine and obtaining clearance from their individual primary care physician.
- Camp will communicate with the local health department and parents.
- Based on consultation with the local health department, the entire camp may be closed based on level of contact and potential exposure.
- Wait 24 hours, then complete extra cleaning/disinfection of all areas, not just high touch surfaces, and assess if a 'waiting period' should be implemented before returning to the program area.

## **Swimming/Recreational Water Activities**

- Groups will utilize their own designated area at the beach and in the water.
- Groups will maintain the limit of 10 participants, including staff.
- Groups should not mix at any time, with less than a 6ft. physical distance between them.
- No close physical contact during swimming activities.
- No sand toys or other shared equipment will be taken down to the beach area.

## **Sports**

- Groups may not exceed the limit of 10 participants, including staff. Groups should not mix at any time, with less than a 6ft. physical distance between them.
- No close physical contact during sports activities.
- Sports equipment will be cleaned after each use.
